

Power of Six Sigma in Hospital & Healthcare Management

Day & Date: Thursday, 5th May 2016
Time: 12:30 pm to 2:00 pm
Venue: Convention Hall, Symbiosis International University, Lavale campus, Pune
Speaker: Dr. Pradeep Bhardwaj
Report prepared by: Ms. Richa Gupta, Student, MBA - HHM (2015-2017)

The session started with a brief introduction about the 6-sigma and its need in the healthcare. Six sigma can change the face of modern hospital and healthcare. Healthcare is the most complex organization as it has got a variety of different kinds of employees. DMAC is the fundamental principle.

He explained how his organization Six-sigma star healthcare takes-over and makes-over the clients making them more efficient and removing the pain points and any roadblocks encountered. Apart from offering an International hallmark of quality excellence the several other beneficial outcomes to an organization.

Sir explained the importance of practicing CPD (continued professional development), until it is practiced you will not be able to increase your market value. If you don't grow the competition will grow.

A patient may survive without a doctor but a doctor cant survives without a patient. At present Six-sigma star healthcare is present in 42 cities across India
